Reasons for Allowance

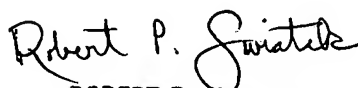

The following is an examiner's statement of reasons for allowance: The claims in this application have been allowed because the prior art does not disclose a life support system including two oxygen supplies: a first supply being of pure oxygen or oxygen-enriched gas at a first supplied pressure and a second supply being of oxygen-enriched gas containing a lower concentration of oxygen than that in the first supply but being supplied at a higher pressure than that of the first supply. A prior art reference discloses an aircraft oxygen supply arrangement having an oxygen source for the pilot and a second, separate supply for the copilot and passengers; however, the relative concentrations and pressures are not as recited above. Another system for providing breathable gas to occupants of an aircraft employs first and second tanks for use by the passengers and crew, respectively. Although the crew breathes pure oxygen in this latter system, the passengers breathe a mixed gas having a lower oxygen partial pressure. The second, mixed gas is not described as being supplied at a pressure higher than that of the pure oxygen for the crew.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings

The drawings are objected to because Figure 2 is not labeled as such. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
